PROFESSIONAL SUMMARY

Entry-level Data Scientist with hands-on experience in Python, SQL, Machine Learning, and Business Intelligence. Worked on real world datasets involving customer churn prediction, content analytics, and performance dashboards. Strong foundation in data cleaning, exploratory data analysis, model evaluation, and translating data insights into business understanding. Available for immediate joining in the UAE.

PROJECTS

Bank Customer Churn Prediction | Python, Machine Learning, Streamlit

- Performed EDA and data preprocessing (encoding, scaling, feature selection) to understand customer behavior patterns
- Addressed **class imbalance using SMOTE** and analyzed its impact on churn prediction
- Trained and evaluated multiple models using **precision, recall and confusion matrix**
- Optimized the best model using **GridSearchCV** and deployed it using **Streamlit**

Netflix Originals Analysis Dashboard | Power BI

- Built an interactive Power BI dashboard to analyze **content quality, genres, languages, runtime, and release trends**
- Created **KPIs** such as average IMDb rating, total titles, and % of high-rated content
- Found that **only ~26% of titles are rated above 7**, highlighting quality vs quantity gaps
- Used **Power Query for data cleaning** and **basic DAX** for calculations

Spotify Music Analysis Dashboard | Tableau

- Analyzed **8.6K+ tracks across 2.5K artists** to identify popularity trends, genre distribution, and release growth
- Designed an interactive **Tableau dashboard with KPIs** (total tracks, artists, avg popularity)
- Used **Top-N analysis** to show that a small number of artists/tracks dominate engagement
- Performed **time-series analysis** to visualize music release trends over years

PROFESSIONAL EXPERIENCE (INTERNSHIP)

Data Science & Analytics Intern | Techolas Technologies

October 2025 - Present

- Improved data quality by cleaning and preparing datasets using Python and Pandas, reducing inconsistencies by ~20%.
- Prepared reports and communicated insights to mentors and team members.
- Tracked KPIs and project metrics using Power BI.
- Documented analysis steps and presented findings clearly.
- Learned statistical concepts, ML and visualization fundamentals.

Software developer Training | Brototype

May 2024 - June 2025

- Built responsive web pages and tested backend workflows.
- Used Git/GitHub for project documentation.
- Gained foundational exposure to full-stack development concepts

SKILLS

- Programming & Analysis:** Python, SQL, Excel
- Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- Visualization:** Power BI, Tableau
- Tools:** Jupyter Notebook, Git, GitHub, VS Code
- Additional Technologies:** HTML, CSS, JavaScript, Node.js & Express.js (Basics), MongoDB

EDUCATION

Wadihuda Institute of Research and Advanced Studies (WIRAS)

Bachelor of Computer Application (BCA)

Kannur, Kerala, India

October 2021 - May 2024

- First prize winner at coding quiz, [4th Semester, 2023]
- Recalio** – Final Year Project (Python, MySQL)
Developed a web application designed to support Alzheimer's patients, caretakers, and doctors by improving communication and care coordination.

CERTIFICATIONS/COURSES

One Million Prompters - Dubai Future Foundation & Dubai Centre for AI

September 2025
